Discontinuation of XXK Cassette Systems

Dear valued customer,

As you know, the Medical Device Regulation 2017/745 (MDR) is about to come into force: The regulation will come into effect on May 26, 2021.

In the course of the upcoming change in the European Medical Device Regulation, we will streamline our product portfolio. As of May 24, 2021, we will remove our XXK Cassette Systems from our range.

This is the list of affected products:

Item code	Description
XXK100	ULTRA-HIGHVAC SET cassette complete
XXK101	ULTRA-HIGHVAC SET 19G cassette with sleeve and test chamber
XXK120	ULTRA-HIGHVAC SET 20G cassette with phaco tipp, sleeve and test chamber
XXKxyz	All other cassettes

We are happy to accept your last orders so that we can ship the products to you on time.

We have some left materials on stock to produce approximately 180 Boxes of XXK cassettes. As soon as the material has been used off, we are not able to produce any further cassettes.

We will take the orders into account according their received order date.

Feel free to contact us if you have any questions.

Best regards,
Medicel AG

Steven Eberle
Product Manager
